

Dear Virtual Nation Builders,

It is with great pleasure that I write this letter to express my heartfelt appreciation for the exceptional assistance that you have provided to the Amandebele people. We are truly grateful for your unwavering support, dedication, and commitment towards our community. Your contributions have been invaluable in advancing our society, and we cannot thank you enough for your selfless efforts. Your philanthropic work has been of immense benefit to us, and we are honored to have such remarkable partners like you.

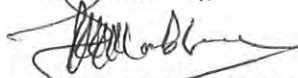

I am particularly impressed by your innovative approach to utilizing technology to foster growth and development in Africa. Your pioneering efforts in introducing the Cowrie token to the continent will undoubtedly revolutionize the financial landscape and empower many to emerge from poverty. I am confident that the Cowrie token will bring prosperity to our people, and we look forward to the tremendous opportunities that lie ahead.

Furthermore, I would like to express my deep appreciation for the creation of Alkabulan, a metaversette that Virtual Nation Builders created to preserve the rich cultural heritage of Africa. Your initiative to showcase and celebrate our diverse cultural traditions is admirable and essential in promoting a deeper understanding and appreciation of our people's roots. We are truly honored that you have taken up the mantle of preserving our heritage.

Furthermore, I would like to express my deep appreciation for the Legal Resource Centre, which Virtual Nation Builders provided for the Ndebele people. This resource has provided vital legal information and empowered our people with knowledge of their legal rights. Your efforts have been instrumental in ensuring that our community is informed and able to make informed decisions.

Once again, I extend my sincere appreciation for your incredible work, and I pray that you will continue to bless our nation with your remarkable initiatives.

Yours sincerely,

HIS MAJESTY KING MAKHOSOKE II
King of the Amandebele
